Review Report

To the Board of Directors of EFG Holding Company

Introduction

We have performed a limited review for the accompanying separate statement of financial position of EFG Holding Company (Egyptian Joint Stock Company) as of 30 June, 2025 and the related separate statements of income, comprehensive income, changes in equity and cash flows for the six months then ended, and a summary of significant accounting policies and other explanatory notes. The company's management is responsible for the preparation and fair presentation of these separate interim financial statements in accordance with Egyptian Accounting Standards. Our responsibility is to express a conclusion on these separate interim financial statements based on our limited review.

Scope of Limited Review

We conducted our limited review in accordance with Egyptian Standard on Review Engagements 2410, "Limited Review of Interim Financial Statements Performed by the Independent Auditor of the Entity." A limited review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters in the Company, and applying analytical and other limited review procedures. A limited review is substantially less in scope than an audit conducted in accordance with Egyptian Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on these interim financial statements.

Conclusion

Based on our limited review, nothing has come to our attention that causes us to believe that the accompanying separate interim financial statements do not present fairly, in all material respects, the unconsolidated financial position of the Company as at 30 June, 2025 and of its unconsolidated financial performance and its unconsolidated cash flows for the six months then ended in accordance with Egyptian Accounting Standards.

EFG Holding Company**(Egyptian Joint Stock Company)****Notes to the separate interim financial statements****For the interim period ended June 30, 2025****(In the notes all amounts are shown in EGP Thousands unless otherwise stated)**

1- Description of business**1-1 Legal status**

EFG Holding (Previously EFG - Hermes Holding Company) S.A.E “the company” is an Egyptian Joint Stock Company subject to the provisions of the Capital Market Law No.95 of 1992 and its executive regulations. The Company’s registered office is located in Smart Village building No. B129, phase 3, KM 28 Cairo Alexandria Desert Road, 6 October, Egypt.

The name of the company have been changed to EFG Holding based of the General Assembly’s approved dated May 24, 2023 and was reflected in the commercial register on June 14, 2023.

1-2 Purpose of the company

- EFG Holding is a premiere financial services corporation that offers diverse investment banking services including securities brokerage, investment banking, asset management and private equity, in addition to its non-banking financial products, including leasing, micro-finance, factoring, securitization, collection and Sukuk.
- The purpose of the company includes participation in the establishment of companies that issues securities or in increasing their share capital, custody activities and margin trading.

2- Basis of preparation**2-1 Statement of compliance**

- These financial statements have been prepared in accordance with the Egyptian Accounting Standards and relevant Egyptian laws and regulations.
- The financial statements were authorized for issue in accordance with a resolution of the board of directors on 13 August 2025.

2-2 Functional and presentation currency

These financial statements are presented in Egyptian Pounds (EGP), which is the Company’s functional currency and all the financial data presented are in Egyptian Pounds (EGP).

2-3 Use of estimates and judgments

In preparing these consolidated financial statements, management has made judgements, estimates and assumptions that affect the application of the Group's accounting policies and the reported amounts of assets, liabilities, income, and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognized prospectively.

- Estimates and assumptions about them are re-viewed on regular basis.
- The change in accounting estimates is recognized in the period where the estimate is changed whether the change affects only that period, or in the period of change and the future periods if the change affects them both.

2-4 Consolidated financial statements

The Company has subsidiaries and according to the Egyptian Accounting Standard No. 42 "consolidated financial statements" and the article No. 188 of the executive regulation of law No. 159-1981, the Company is required to prepare consolidated financial statements which present fairly the financial position, the result of operations and cash flows for the group as a whole.

27- Tax status

- As to Income Tax, for the years from the start of operations until 2019, the competent Tax Inspectorate inspected the parent company's books and all the disputed points have been settled with the Internal Committee. And as to years 2020/2024 have not been inspected yet.
- As to Salaries Tax, the parent company's books had been examined till 2022 and all the disputed points have been settled with the Internal committee and as to years 2023/June 2025, the company paid tax monthly and have not been inspected yet.
- As to Stamp Tax, the parent company's books had been examined from year 1998 till 2022 and all the disputed points have been settled with the competent Tax Inspectorate and as to years 2023/2024 have not been inspected yet.
- As to Property Tax, for Nile City building, the company paid tax till December 31, 2025 and as for Smart Village building, the company paid tax till December 31, 2025.

28- Related party transactions

The related parties transactions are represented in the following:

- Other income item an amount of EGP Thousands 31 139 which represents the value of rental spaces for some affiliated companies.
- Interest income item presented in the income statement includes an amount of EGP Thousands 14 993 represent the interest on subordinated loan to EFG Corp – Solutions and an amount of EGP Thousands 23 188 to TANMEYA for micro finance and an amount of EGP Thousands 63 758 to U Consumer Finance and an amount of EGP Thousands 83 984 to EFG Finance Holding.
- Finance cost item presented in the income statement includes an amount of EGP Thousands 59 301 from Hermes securities brokerage and an amount of EGP Thousands 231 from EFG International Treasury Management.
- The company grants support loans to some companies for purpose of providing financial leverage (Note no. 11).

29- Measurement of fair value

- Countless group's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.
- When measuring the fair value of an asset or a liability, the Group uses observable market data as far as possible. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.
 - Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
 - Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
 - Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).
- If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.
- Valuation techniques include net present value and discounted cash flow models, comparison with similar instruments for which observable market prices exist and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premiums used in estimating discount rates, bond and equity prices, foreign currency exchange rates.
- The following table analyses financial instruments measured at fair value at the reporting date, by the level in the fair value hierarchy into which the fair value measurement is categorized. The amounts are based on the values recognized in the statement of financial position:

31- Financial instruments and management of related risks:

The Company's financial instruments are represented in the financial assets and liabilities. Financial assets include cash balances with banks, investments and debtors while financial liabilities include loans and creditors. Notes to financial statements includes significant accounting policies applied regarding basis of recognition and measurement of the important financial instruments and related revenues and expenses by the company to minimize the consequences of such risks.

31/1 Market risk

A. Foreign currencies risk

- The foreign currencies exchange risk represents the risk of fluctuation in exchange rates, which in turn affects the Company's cash inflows and outflows as well as the value of its assets and liabilities in foreign currencies.
- As at the financial position date the Company has assets and liabilities in foreign currencies equivalent to EGP 15 556 222 Thousands and EGP 5 009 206 Thousands respectively. The Company's net exposures in foreign currencies as at the financial position date are as follows:

	Surplus (Deficit)
	EGP Thousands
USD	9 937 297
EURO	535 737
AED	80 133
GBP	(6 899)
CHF	647
SAR	101

The company has used the prevailing exchange rates to revalue assets and liabilities at financial position date as disclosed in note (33-1-1) "foreign currencies transactions".

B. Interest rate risk

The cash flows of the Company affected by the changes in market rates of interest. To mitigate interest rate risk, the company maintains banks deposits for short-term periods renewed monthly, and are negotiated in the re-pricing date comparing to interest rates announced by the central bank or LIBOR.

C. Price risk

The Company is exposed to market price risk for equity instruments, According to the company's investment policy, the following procedures are undertaken to reduce the effect of this risk:

- Performing the necessary studies before investment decision to verify that investment is made in potential securities.
- Diversification of investments in different sectors and industries.
- Performing continuous studies required to follow up the Company's investments and their development.

31/2 Credit risk

Financial institutions that the Company deals with are only those enjoying high credit quality. The Company has policies that limit the amount of credit exposure to any one financial institution.

31/3 Liquidity risk

Liquidity risk is represented in the factors, which may affect the Company's ability to pay part of or full amount of its liabilities. According to the Company's policy, sufficient cash balances are retained to meet the Company's current liabilities which minimize the liquidity risk.

31/4 Capital risk

The goal of the Company's management of capital management is to maintain the Company's ability to continue to achieve returns for shareholders and benefits for other parties that use financial statements. The management company also aims to provide and maintain the best capital structure which would lead to lower capital costs.

31/5 Financial instruments' fair value

The financial instruments' fair value does not substantially deviated from its book value at the financial position date.

31/6 Derivative financial instruments and hedge accounting

Derivatives are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at their fair value according to the valuation basis applied, in accounting policies to derivative financial instrument.

32- Important events:

The monetary policy of the Central Bank of Egypt decided to set the basic trends at 225 basis points in its meeting on April 17, 2025, to reach the overnight deposit rate and the Central Bank's home page rate of 25%, 26%, and 25.5%, respectively. The credit and discount rates were also reduced by 225 basis points to reach 25.5% in addition to, Central Bank of Egypt allowed Exchange rates determination to be according to market mechanisms.

The Monetary Policy Committee (MPC) of the Central Bank of Egypt (CBE) has decided today to cut the CBE's overnight deposit rate, overnight lending rate, and the rate of the main operation by 100 basis points to 24.00 percent, 25.00 percent, and 24.50 percent, respectively. The Committee also decided to cut the discount rate by 100 basis points to 24.50 percent. This decision reflects the most recent outlook and assessment of economic conditions since the previous MPC meeting.

33- Significant accounting policies applied

33-1 Basis of preparation

33-1-1 Translation of the foreign currencies' transactions

Transactions in foreign currencies are translated into the respective functional currencies of Group companies at the exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value was determined. Non-monetary items that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction.

33-2 Property, plant, and equipment

33-2-1 Recognition and measurement

Items of property, plant, and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses. The cost of certain items of property, plant, and equipment. If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant, and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognized in profit or loss.

33-2-2 Subsequent expenditure

Subsequent expenditure is capitalized only if it is probable that the future economic benefits associated with the expenditure will flow to the Company.

33-2-3 Depreciation

Depreciation is calculated to write off the cost of items of property, plant and equipment less their estimated residual values using the straight-line method over their estimated useful lives, and is generally recognized in profit or loss. Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Company will obtain ownership by the end of the lease term. Land is not depreciated.

The estimated useful lives of property, plant and equipment for current and comparative periods are as follows:

Assets	Estimated useful life
- Buildings	33.3 years
- Furniture, office and electrical appliances	5 years
- Computer equipment	5 years
- Vehicles & transportation means	5 years
- Fixtures	5 years

Improvements are depreciated in leased locations over the contract life or the useful life whichever is less.

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

33-2-4 Re-classification to investment property

When the use of a property changes from owner-occupied to investment property.

33-2-5 Intangible assets

Intangible assets are recorded at historical cost less accumulated amortization and any impairment losses (note 33-5), intangible assets are amortized using the straight-line method and are recognized in profit or loss over their estimated useful lives.

33-3 Investments

33-3-1 Investments in subsidiaries

Investments in subsidiaries and associates are valued at cost, the book value is amended by any impairment concerning the value of these investments (note 33-5). The impairment value is to be charged to the income statement for every investment individually.

33-3-2 Investment property

Investment property is measured at cost on initial recognition.

Subsequent to initial recognition investment property is measured at cost less accumulated depreciation and impairment loss, if any. Investment property is depreciated on a straight-line basis over its useful life.

The estimated useful life of investment property is 33.3 years.

The profits or losses resulting from the disposal of the Investment property (calculated as the difference between the net proceeds from the disposal of the property and the net book value of it) in the profits or losses.

33-4 Financial instruments

33-4-1 Recognition and initial measurement

Trade receivables and debt securities issued are initially recognized when they are originated. All other financial assets and financial liabilities are initially recognized when the Company becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

33-4-2 Classification and subsequent measurement **Financial assets**

On initial recognition, a financial asset is classified as measured at: amortised cost; FVOCI – debt investment; FVOCI – equity investment; or FVTPL.

Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment's fair value in OCI. This election is made on an instrument-by-instrument basis.

All financial assets not classified as measured at amortized cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortized cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

33-4-3 Financial assets – Business model assessment

The Company assesses the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed, and information is provided to management. The information considered includes:

- The stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realizing cash flows through the sale of the assets;
- How the performance of the portfolio is evaluated and reported to the Company's management;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- How managers of the business are compensated – e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- The frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Company's continuing recognition of the assets.

Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

33-4-4 Financial assets – Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, ‘principal’ is defined as the fair value of the financial asset on initial recognition. ‘Interest’ is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- Contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable-rate features;
- Prepayment and extension features; and
- Terms that limit the Company’s claim to cash flows from specified assets (e.g. non-recourse features).

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable compensation for early termination of the contract. Additionally, for a financial asset acquired at a discount or premium to its contractual par amount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is insignificant at initial recognition.

33-4-5 Financial assets – Subsequent measurement and gains and losses

Financial assets at FVTPL	These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss.
Financial assets at amortised cost	These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.
Debt investments at FVOCI	These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognised in profit or loss. Other net gains and losses are recognised in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.
Equity investments at FVOCI	These assets are subsequently measured at fair value. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are never reclassified to profit or loss.

33-4-6 Financial liabilities – Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

33-4-7 Derecognition

Financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Company enters into transactions whereby it transfers assets recognised in its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognised.

Financial liabilities

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire. The Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

33-4-8 Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

33-4-9 Derivative financial instruments and hedge accounting

The Company holds derivative financial instruments to hedge its foreign currency and interest rate risk exposures. Embedded derivatives are separated from the host contract and accounted for separately if the host contract is not a financial asset and certain criteria are met.

Derivatives are initially measured at fair value. Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are generally recognised in profit or loss.

The Company designates certain derivatives as hedging instruments to hedge the variability in cash flows associated with highly probable forecast transactions arising from changes in foreign exchange rates and interest rates and certain derivatives and non-derivative financial liabilities as hedges of foreign exchange risk on a net investment in a foreign operation.

At inception of designated hedging relationships, the Company documents the risk management objective and strategy for undertaking the hedge. The Company also documents the economic relationship between the hedged item and the hedging instrument, including whether the changes in cash flows of the hedged item and hedging instrument are expected to offset each other.

Cash flow hedges

When a derivative is designated as a cash flow hedging instrument, the effective portion of changes in the fair value of the derivative is recognised in OCI and accumulated in the hedging reserve. The effective portion of changes in the fair value of the derivative that is recognised in OCI is limited to the cumulative change in fair value of the hedged item, determined on a present value basis, from inception of the hedge. Any ineffective portion of changes in the fair value of the derivative is recognised immediately in profit or loss.

The Company designates only the change in fair value of the spot element of forward exchange contracts as the hedging instrument in cash flow hedging relationships. The change in fair value of the forward element of forward exchange contracts (forward points) is separately accounted for as a cost of hedging and recognised in a costs of hedging reserve within equity.

When the hedged forecast transaction subsequently results in the recognition of a non-financial item such as inventory, the amount accumulated in the hedging reserve and the cost of hedging reserve is included directly in the initial cost of the non-financial item when it is recognised.

For all other hedged forecast transactions, the amount accumulated in the hedging reserve and the cost of hedging reserve is reclassified to profit or loss in the same period or periods during which the hedged expected future cash flows affect profit or loss.

If the hedge no longer meets the criteria for hedge accounting or the hedging instrument is sold, expires, is terminated or is exercised, then hedge accounting is discontinued prospectively. When hedge accounting for cash flow hedges is discontinued, the amount that has been accumulated in the hedging reserve remains in equity until, for a hedge of a transaction resulting in the recognition of a non-financial item, it is included in the non-financial item's cost on its initial recognition or, For other cash flow hedges, it is reclassified to profit or loss in the same period or periods as the hedged expected future cash flows affect profit or loss.

If the hedged future cash flows are no longer expected to occur, then the amounts that have been accumulated in the hedging reserve and the cost of hedging reserve are immediately reclassified to profit or loss.

Net investment hedges

When a derivative instrument or a non-derivative financial liability is designated as the hedging instrument in a hedge of a net investment in a foreign operation, the effective portion of, for a derivative, changes in the fair value of the hedging instrument or, for a non-derivative, foreign exchange gains and losses is recognised in OCI and presented in the translation reserve within equity. Any ineffective portion of the changes in the fair value of the derivative or foreign exchange gains and losses on the non-derivative is recognised immediately in profit or loss. The amount recognised in OCI is reclassified to profit or loss as a reclassification adjustment on disposal of the foreign operation.

33-5 Impairment

33-5-1 Non-derivative financial assets

Financial instruments and contract assets

The Company recognises loss allowances for Expected Credit Loss (ECLs) on:

- Financial assets measured at amortised cost;
- Debt investments measured at FVOCI;
- contract assets.

The Company also recognises loss allowances for ECLs on loans receivables.

The Company measures loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured at 12-month ECLs:

- Debt securities that are determined to have low credit risk at the reporting date; and
- Other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment, that includes forward-looking information.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due, unless it can be rebutted.

The Company considers a financial asset to be in default when:

- The debtor is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security (if any is held); or
- The financial asset is more than 90 days past due unless it can be rebutted.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

33-5-2 Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive).

ECLs are discounted at the effective interest rate of the financial asset.

33-5-3 Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets carried at amortised cost and debt securities at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- Significant financial difficulty of the debtor;
- A breach of contract such as a default or being more than 90 days past due;
- The restructuring of a loan or advance by the Company on terms that the Company would not consider otherwise;
- It is probable that the debtor will enter bankruptcy or other financial reorganisation; or
- The disappearance of an active market for a security because of financial difficulties.

33-5-4 Presentation of allowance for ECL in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

For debt securities at FVOCI, the loss allowance is charged to profit or loss and is recognised in OCI.

33-5-5 Write-off

The gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. For individual customers, the Company has a policy of writing off the gross carrying amount when the financial asset is 180 days past due based on historical experience of recoveries of similar assets. For corporate customers, the Company individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Company expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

33-5-6 Non-financial assets

- At each reporting date, the Company reviews the carrying amounts of its non-financial assets (other than, investment property, contract assets and deferred tax assets) to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. Goodwill is tested annually for impairment.
- For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs. Goodwill arising from a business combination is allocated to CGUs or groups of CGUs that are expected to benefit from the synergies of the combination.
- The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.
- An impairment loss is recognised if the carrying amount of an asset or CGU exceeds its recoverable amount.
- Impairment losses are recognised in profit or loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amounts of the other assets in the CGU on a pro rata basis.
- An impairment loss in respect of goodwill is not reversed. For other assets, an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

33-6 Cash and cash equivalents

For the purpose of preparing the statement of cash flows, cash and cash equivalents includes the balances, whose maturity do not exceed three months from the date of acquisition and the balances included cash on hand, current accounts, time deposits with banks & treasury bills.

33-7 Interest-bearing borrowings

Interest-bearing borrowings are recognized initially at fair value less attributable transaction costs. Subsequent to initial recognition, interest-bearing borrowings are stated at amortized cost with any difference between cost and redemption value being recognized in the income statement over the period of the borrowings on an effective interest basis.

33-8 Provisions

Provisions are recognized when the Company has a legal or constructive current obligation as a result of a past event and it's probable that a flow of economic benefits will be required to settle the obligation. If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessment of the time value of money and, where appropriate, the risks specific to the liability. Provisions are reviewed at the financial position date and amended (when necessary) to represent the best current estimate.

33-9 Legal reserve

The Company's statutes provides for deduction of a sum equal to 5% of the annual net profit for formation of the legal reserve. Such deduction will be ceased when the total reserve reaches an amount equal to half of the Company's issued capital and when the reserve falls below this limit, it shall be necessary to resume

33-10 Share capital

33-10-1 Ordinary shares

Incremental costs directly attributable to the issue of ordinary shares are recognized as a deduction from equity. Income tax relating to transaction costs of an equity transaction are accounted for in accordance with EAS 24 income tax.

33-10-2 Re-purchase and reissue of ordinary shares (treasury shares)

When shares recognized as equity are repurchased, the amount of the consideration paid, which includes directly attributable costs is recognized as a deduction from equity. Repurchased shares are classified as treasury shares and are presented in the treasury share reserve. When treasury shares are sold or reissued subsequently, the amount received is recognized as an increase in equity and the resulting surplus or deficit on the transaction is presented within share premium.

33-11 Revenues

33-11-1 Gains (losses) on sale of investments

Gain (loss) resulted from sale of investments are recognized on transaction date and measured by the difference between cost and selling price less selling commission and expenses.

33-11-2 Dividend income

Dividend income is recognized when declared.

33-11-3 Custody fees

Custody fees are recognized when provide service and issue invoice.

33-11-4 Interest income

Interest income is recognized on time proportion basis to take into account effective yield on the asset.

33-12 Expenses

33-12-1 Borrowing costs

Borrowing costs are recognized as expenses in the income statement when incurred on an effective interest basis.

33-12-2 Employees' pension

The Company contributes to the government social insurance system for the benefit of its personnel in accordance with the social insurance law. Under this law, the employees and the employers contribute into the system on a fixed percentage-of-salaries basis. The Company's liability is confined to the amount of its contribution. Contributions are charged to income statement using the accrual basis of accounting.

33-12-3 Income tax

Income tax on the income statement for the year comprises current and deferred tax. Income tax is recognized in the income statement except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantially enacted at the financial position date, and any adjustment to tax payable in respect of previous years.

Deferred tax is provided using the financial position liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the financial position date.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

33-13 Earnings per share

The Company presents basic earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period.

33-14 Profit sharing to employees

The Company pays 10% of its cash dividends as profit sharing to its employees provided that it will not exceed total employees annual salaries. Profit sharing is recognized as a dividend distribution through equity and as a liability when approved by the Company's shareholders.

33-15 Employees benefits

33-15-1 Share based payments

Equity settled transactions

For equity-settled share-based payment transactions, the company measure the services received, and the corresponding increase in equity, indirectly, by reference to the fair value of the equity instruments granted. The fair value of those equity instruments is measured at grant date.

Vesting conditions, other than market conditions, are taken into account by adjusting the number of equity instruments included in the measurement of the transaction amount so that, ultimately, the amount recognized for services received as consideration for the equity instruments granted are based on the number of equity instruments that eventually vest. Hence, on a cumulative basis, no amount is recognized

for services received if the equity instruments granted do not vest because of failure to satisfy a vesting condition.

The company recognize an amount for the services received during the vesting period based on the best available estimate of the number of equity instruments expected to vest and revise that estimate, if necessary, if subsequent information indicates that the number of equity instruments expected to vest differs from previous estimates. On vesting date, the entity shall revise the estimate to equal the number of equity instruments that ultimately vested.

33-16 Leases

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company uses the definition of a lease in EAS 49.

33-16-1 As a lessee

At commencement or on modification of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices. However, for the leases of property the Company has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

The Company recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Company by the end of the lease term or the cost of the right-of-use asset reflects that the Company will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by

impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

The Company determines its incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of the asset leased.

Lease payments included in the measurement of the lease liability comprise the following:

fixed payments, including in-substance fixed payments;

variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;

amounts expected to be payable under a residual value guarantee; and the exercise price under a purchase option that the Company is reasonably certain to exercise, lease payments in an optional renewal period if the Company is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Company is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee, if the Company changes its assessment of whether it will exercise a purchase, extension or termination option or if there is a revised in-substance fixed lease payment.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Company presents right-of-use assets that do not meet the definition of investment property in 'property, plant and equipment' and lease liabilities in 'loans and borrowings' in the statement of financial position.

Short-term leases and leases of low-value assets

The Company has elected not to recognise right-of-use assets and lease liabilities for leases of low – value assets and short-term leases, including IT equipment. The Company recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

33-16-2 As a lessor

At inception or on modification of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of their relative stand- alone prices.

When the Company acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease.

To classify each lease, the Company makes an overall assessment of whether the lease transfers substantially all of the risks and rewards incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then it is an operating lease. As part of this assessment, the Company considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

When the Company is an intermediate lessor, it accounts for its interests in the head lease and the sub-lease separately. It assesses the lease classification of a sub-lease with reference to the right-of-use asset arising from the head lease, not with reference to the underlying asset. If a head lease is a short-term lease to which the Company applies the exemption described above, then it classifies the sub-lease as an operating lease.

If an arrangement contains lease and non-lease components, then the Company applies EAS 11 to allocate the consideration in the contract.

The Company applies the derecognition and impairment requirements in EAS 47 to the net investment in the lease. The Company further regularly reviews estimated unguaranteed residual values used in calculating the gross investment in the lease.

The Company recognizes lease payments received under operating leases as income on a straight- line basis over the lease term as part of ‘other revenue’.

34-New Editions and Amendments to Egyptian Accounting Standards:

- On 6 March 2023, the Prime Minister's Decree No. (883) of 2023 was issued amending some provisions of the Egyptian accounting standards, and on 3 March 2024, another decision was issued by the Prime Minister No. (636) of 2024 amending some other provisions of the Egyptian accounting standards.
- On October 23, 2024, the Prime Minister issued Decision No. 3527 of 2024, which introduces and adds the new Egyptian Accounting Standard No. (51) titled "Financial Statements in Hyperinflationary Economies."

and the following is a summary of the most important of those amendments:

New or reissued standards	Summary of the most significant amendments	Potential impact on the financial statements	Effective date
Egyptian Accounting Standard No. (50) "Insurance Contracts"	1- This standard determines the principles of recognition of insurance contracts falling within the scope of this standard, and determines their measurement, presentation, and disclosure. The objective of the standard is to ensure that the company provides appropriate information that truthfully reflects those contracts. This information provides users of the financial statements with the basis for assessing the impact of insurance contracts on the company's financial position, financial performance, and cash flows. 2- Egyptian Accounting Standard No. (50) replaces and cancels Egyptian Accounting Standard No. 37 "Insurance Contracts".	Management is currently evaluating the potential impact on the financial statements from the application of the standard.	Egyptian Accounting Standard No. (50) is effective for annual financial periods starting <u>on or after July 1, 2024</u>, and if the Egyptian Accounting Standard No. (50) shall be applied for an earlier period, the company should disclose that fact.

New or reissued standards	Summary of the most significant amendments	Potential impact on the financial statements	Effective date
	3- Any reference to Egyptian Accounting Standard No. (37) in other Egyptian Accounting Standards to be replaced by Egyptian Accounting Standard No. (50). 4- The following Egyptian Accounting Standards have been amended to comply with the requirements of the application of Egyptian Accounting Standard No. (50) "Insurance Contracts", as follows: - Egyptian Accounting Standard No. (10) "Fixed Assets ". - Egyptian Accounting Standard No. (23) "Intangible Assets". - Egyptian Accounting Standard No. (34) "Investment property".		
Accounting Interpretation No. (2) "Carbon Reduction Certificates"	Carbon Credits Certificates: Are financial instruments subject to trading that represent units for reducing greenhouse gas emissions. Each unit represents one ton of equivalent carbon dioxide emissions, and are issued in favor of the reduction project developer (owner/non-owner), after approval and verification in accordance with internationally recognized standards and methodologies for reducing carbon emissions, carried out by verification and certification	The management is currently studying the financial implications of applying the accounting interpretation to the Company's financial statements.	The application starts on or after the first of January 2025, early adaption is allowed.

New or reissued standards	Summary of the most significant amendments	Potential impact on the financial statements	Effective date
	bodies, whether local or international, registered in the list prepared by the Financial Regulatory Authority "FRA" for this purpose. Companies can use Carbon Credits Certificates to meet voluntary emissions reduction targets to achieve carbon trading or other targets, which are traded on the Voluntary Carbon Market "VCM".		
The new Egyptian Accounting Standard No. (51) "Financial Statements in Hyperinflationary Economies."	1- This standard must be applied to financial statements, including consolidated financial statements for any entity whose functional currency is in an economy classified as hyperinflationary. 2- This standard applies to financial statements, including independent and individual financial statements for any entity whose functional currency is in an economy classified as hyperinflationary. It also applies to any group that has foreign operations, including branches, subsidiaries, sister companies, joint ventures, or others in an economy classified as hyperinflationary.	The impact on the financial statements has not yet been determined until the application date is specified.	A decision will be issued by the Prime Minister or an authorized representative to specify the start and end dates for the financial period(s) during which this standard must be applied when the functional currency is the local currency, taking into account the following: (a) This standard must be applied to the financial statements of the entity starting from the beginning of the financial period in which the economy is classified as hyperinflationary. Comparative figures presented in the financial statements

New or reissued standards	Summary of the most significant amendments	Potential impact on the financial statements	Effective date
	3- This standard requires the adjustment of financial statements prepared in the currency of a hyperinflationary economy, aiming to provide useful information about the financial position of the entity, its performance, and changes in its financial position for a wide range of users to make economic decisions based on a fair presentation of the financial statements.		must be adjusted in accordance with the requirements of this standard. (b) As an exception to the requirements of paragraph 39 of Egyptian Accounting Standard No. 1, personal estimates may be used when applying this standard for accounting for foreign operations, such as branches, subsidiaries, sister companies, or joint ventures, to determine whether the economy is hyperinflationary. (c) This standard must be applied to all entities whose functional currency is the currency in which the economy has been classified as hyperinflationary.
